# Snow Socks for Snow and Icy Conditions

Unpredictable and difficult winter driving conditions can demand more traction than your vehicle's tires deliver.

Snow Socks are fabric covers that slip over wheels to give you better traction at speeds up to 25MPH. They're an easy-to-use alternative to tire chains – which can be expensive, difficult to mount and hard on your car.

Using innovative technology developed in Europe, Snow Socks' strong textile surface provides instant grip on snowy and icy roads.

ISSE Snow Socks are machine washable and reusable.

Be prepared for anything. Make Snow Socks an essential part of your car's winter survival kit.

**Passenger vehicles are permitted in chain control areas, listed below, when equipped with Alternative Traction Device (ATD).**

|  <b>SUPER</b>   |  |  |  |  |   |

We have innovated and incorporated the latest technologies to bring you our snow socks.

**TriboTek:** The patented woven design gives extra traction on ice and snow, optimizing the effect of the tribologic law of physics.

**NanoTek:** A nanotechnology that “traps” certain molecules responsible for the bad odor and the development of bacteria.

**HTS, High Tenacity System\*:** ISSE Safety engineers and manufactures its own fibers in Spain. The HTS is the result of years of R&D. These extra resistant fibers are also used on off shore oil platforms.

**EcoTex:** This special textile made of Polyolefin can be recycled.

**Activ3D:** Specific 3D braiding that provides longer lasting and better grip in deep snow conditions.

## ISSE Tribologic Technology

Textile tire covers for traction on snow. ISSE Snow Socks provide safety and traction in extreme driving conditions.

- ISSE is a **patented product**. It is certified by TUV and Onorm 5121,B26.
- **Very easy to install** especially when compared to standard metallic snow chains, and when taking into account the extreme conditions of use.
- **Less risk of damaging the car**, (ABS, EPS, etc.), tires or road.

**No vibration**, compared to when using metal snow chains. ISSE offers improved drivability and traction.

- **Easily stored** in the trunk of the car. Washable.

**Warranty:** Isse Snow Socks are warranted against all manufacturing defects. This warranty excludes the following: Incorrect installation, excessive speed (above 25 mph) or wear and tear due to use on land, dirt, mud, sand, gravel or where ice and/or snow is not present. The warranty is limited to the coverage of replacement parts or defective parts. We do not indemnify against material or bodily damages which may be caused by the Snow Socks. Should any limitations be noted by the manufacturer or manufacturers of vehicles with regard to the use in certain types of vehicles, any warranty on Isse products installed on these types of vehicles will not apply.

ISSE provides two specific important advantages due to the innovative design of its snow socks.

1. The various combinations of wheel diameter, tire profile and width are taken into account in a way that requires less sku's to fit the entire range of tires.
2. They work so they are automatically and perfectly centered on the tire after a very short time of use.

ISSE fits all tire sizes for cars, SUVs, 4 wheel drive vehicles, buses, trucks and industrial machinery:

- 2 different styles for cars, SUVs, mini-vans and 4 wheel drive vehicles.
- Currently available in 7 different sizes that fit the entire range of tires present in the market.
- 1 model for trucks and buses available in 11 sizes (fits to any truck tire size in the market).
- 1 model for industrial machinery (forklifts, etc.), available in 14 sizes.

# CLASSIC

For occasional use when stuck in snow or during severe snow falls. For cars, SUVs, mini-vans and four wheel drive vehicles.

The Snow Socks are a long life product when used on snow and icy conditions at the maximum speed of 25 mph.

**Note: ISSE Snow Socks are not intended for use on dry asphalt.**

### Fabric Specifications:

100% polyolefin.

Reusable and machine washable. 

Manufactured in Spain.

### How To Find Your Size!

Width  
Profile  
Structure type  
Rim

Then Locate The Tire Size In The Chart On This Page!

**Maximum Speed 25 MPH/40Km/h**  
**Never Exceed Maximum!**

# Installation

## INSTALLATION OF THE SNOW SOCKS

For quick and easy installation:

1. Stretch the sock over the top portion of the tire (as if it were a cover).
2. Pull it down as far as possible onto the tire.
3. Move the vehicle slightly forwards or backwards so you can stretch it over the bare part of the tire until it is completely covered.
4. You are now ready to drive.

**Insurance in  
your trunk.**

**Make Snow Socks  
an essential part  
of your car's winter  
survival kit.**
