LED Light

17040 Straight Knife

17041 45° Angle Knife

Heating Knives

Heating / melting / ironing the surface, to strengthen the durability and life.

90° Angle Stapling

Straight Stapling

Stapling

Two position probe- 90° & straight stapling. A large variety of core cut staples for tacking or seaming.

The Shark Pro-Tack Welder is an Eco-friendly welder that is great for repairing virtually anything made of plastic. It can fix everything from car bumpers to wheel barrels. It is as good for Industrial use as it is for Automotive applications.

Unlike most other plastic welders, it is rated to a maximum of 65 Amps and has 4 power settings. Our unique core-cut staples easily break off without cutting, affording an advantage over other staples. It comes with 2 additional adaptors that go over the 2 probes and act as an iron for smoothing the plastic after welding.

Unlike the time-consuming plastic welders requiring plastic rods, this is a much quicker fix that adds the stability of metal staples; making the end result much stronger!

Kit Includes

- 4 Staple Styles
- 2 Heating Knives (17040 & 17041)
- Plastic Box for Staples
- 2 Position Probe 90° & Straight
